

Untitled

Calling C from R

I use .Call to call a function for computing danger in Jurassic Park

```
library(IslaNublar)
Malcom() # Just a simple function in R
```

```
## Life finds a way
```

```
Park(people = 10, dino = 6)
```

```
## Picsou!
```

```
## Grrr
```

```
## Picsou!
```

```
## [1] 2.52
```

```
## [1] 63.48
```
